

Machine and Building Maintenance Technician 2

I am looking for a good fit for our company. I am more interested in the right personality and work ethic. This is a position where experience is often more valuable than schooling or education. A machine repair or millwright journey man's card would be looked on very favorably. Specific training on repairing machines at a machine builder, perhaps Mori Seiki, OKK, Kitamura, would be looked on extremely favorably.

Machine and Building Maintenance Technician 2

- Fork truck experience is a must.
- Several years experience in the manufacturing environment.
- Preferably experienced in machine repair or millwright.
- Mechanical experience and knowledge.
- Electrical experience and knowledge.
- Plumbing experience and knowledge.
- Basic construction, building repair and upkeep experience and knowledge.
- Needs to be able to lift 50 pounds.
- Able to read manufacturing blue prints.
- Some computer knowledge.

More than any of the above, I am looking for a long term candidate who is self motivated, energetic, trainable, and eager to learn and able to stay on task with minimal supervision.

The ideal candidate would meet the criteria below:

Machine and Building Maintenance Technician 2

- Applicant must be able to work in a team environment maintaining equipment, buildings, and property.
- Be able to read and interpret mechanical, electrical and hydraulic, prints, and schematics.
- Be able to trouble shoot and repair equipment failures.
- Be comfortable working on robotic welding stations, CNC lathes, and CNC vertical and horizontal machining centers all with Fanuc controls.
- Be able to lift 50 pounds repetitively, pass drug and background check and have good attendance, good work ethic, and trainability.
- Must have the tools to do the job, including measurement tools, and standard manufacturing tools.
- Have a strong mechanical and electronics background.
- Have a basic understanding of electrical, plumbing and construction techniques for building and ground s upkeep.
- The applicant must possess knowledge of manufacturing principles and techniques, preferably have experience in machine repair or millwright, be able to do maintenance welding, and machine parts for the repair and upkeep of equipment.
- Some computer knowledge expected.
